

Black Mulch Film

Benefits

Earlier Planting Dates

Soil Moisture Retention

Reduction in Leaching of Fertilizer

Improved Crop Quality

Weed Management

**Reduction in Soil Compaction
& Root Damage**

Canada Covers' Black Mulch Film is used to suppress weeds while also conserving water in both crop production and landscaping. It acts as a barrier to keep methyl bromide, a powerful fumigant and ozone-depleting substance, in the soil. It is used in conjunction with drip irrigation to provide optimal growing conditions for the plants. Canada Covers brings you a high quality Black Mulch Film with a higher elongation level and tear strength which allows users to remove and reuse our Film the for next season.

SPECIFICATIONS

BLACK MULCH COVER FILM	
RESIN	POLYETHYLENE PE
COLOUR	BLACK
WEIGHT	18-28 GSM
THICKNESS	0.9 MIL TO 1.6 MIL
WIDTH	4 FT
ROLL LENGTH	4000 FT & 6000FT
ROLL WEIGHT	27 KG
CORE TYPE	3" CARDBOARD
SKIDS PER CONTAINER	36-44
PACKAGING	CLEAR POLY BAG
ROLL PROFILE	FLAT FABRIC
UV PROTECTION	6 MONTHS
