

# Floating Row Cover

## Benefits

**Improved Crop Quality**

**Earlier Planting Dates**

**Healthier Seedlings**

**Rain & Hail Protection**

**Frost Damage Protection**

Our Floating Row Cover is an extremely lightweight fabric which can be placed directly over the plants without the need for supporting framework. The Cover can instead be anchored to the ground, regardless of the wind conditions. Canada Covers' Floating Row Cover protects the plants from cold and frost. The Floating Row Cover minimizes the dangers caused by hail, heavy rain and storms while also increasing the amount of growing days within a season by up to 3 weeks. Plants will grow quicker.
